

RETAIL FOOD OPERATIONS POLICIES, PROCEDURES, AND STANDARDS MANUAL

Table of Contents

PREFACE

Log of HACCP manual changes
Food HACCP definitions
References

SYSTEM AND OPERATIONS DESCRIPTION

Food safety assurance
Operation description
Menu HACCP and hazard identification of food items
Organization and job responsibilities
Environment and facility description
Facility plan and food flow
Major equipment description
Enclosures
1. Retail food safety management: Evidence of Active Managerial Control
2. Operation description
3. Cook control – Menu-product groups
4. Cook controls for safe products
5. Supplier control – Menu-product groups
6. Supplier controls for safe products
7. Menu item allergen analysis / example
8. Detailed list of food allergens and food intolerance
9. Organization and job responsibilities chart
10. Environment and facility description and pictures
11. Facility plan
12. Major equipment items

MANAGEMENT

AMC-HACCP Management

Food safety policy
Control of documents
Management responsibility
 Food safety management plan
 Evaluation of unit performance; management review
 Food safety improvement program
 The person in charge (PIC)
 Holding subordinates responsible
Foodborne illness complaints and hoaxes
Food security
 Management
 Human element – staff
 Human element – public
 Facility
 Operations
Food sabotage
Emergencies
 Power outage
 Water contamination

Fire and natural disasters
Choking
Recalls
Enclosures (A)
1. Foodborne illness information form
2. Analysis of an alleged foodborne illness
3. Usual incubation / onset period ranges for select foodborne diseases

QA, QC, and the HACCP Team

Control of non-conformity
Self-inspection and food hazard control checklists
HACCP team operations
 Problem solving
 Coaching and skill development
 Setting the example
 Food safety self-inspection
 HACCP team meeting, report, and corrective action
 Filing the report
Regulatory / third-party audit
HACCP reassessment
Equipment performance calibration and verification
 Food temperature measurement and thermometer calibration
Enclosures (B)
1. Daily QA checklist
2. Monthly QA checklist
3. HACCP team monthly meeting report
4. Corrective action report
5. HACCP reassessment

Training Program

Training plan
New employee training and certification
Continuing education and employee recertification
Employee training records
Enclosures (C)
1. Training plan
2. Lesson plan form
3. Employee food HACCP training knowledge demonstration tests and certification
4. Continuing education training record

PREREQUISITE PROCESSES (SSOP / GMP)

Personal Hygiene

Employee personal hygiene policies
 Individual illness and disease control
 Cuts and abrasions
 Personal cleanliness
 Fingernails

Hair restraint
Jewelry and hard objects
Handkerchiefs and facial tissues
Chewing gum, smoking, and eating
Gloves
 How to use gloves
 Disposable gloves
 Heavy-duty gloves
Hand washing
 Employee hand washing policies
 Double hand wash
 Single hand wash
 Handling food, money, and dirty tableware
Medicines
First aid
 Hand cuts and abrasions
 Contact with blood or body fluids from another person
Enclosures (A)
1. Ill employee exclusion

Facility and Equipment Cleaning, Sanitation, and Pest Control

Cleaning plan and report
Cleaning chemicals and control
Knowing that surfaces and equipment are sanitized
Cross-contamination
 What is cross-contamination?
 How to prevent cross-contamination
Using sanitizer
 What to use
 How to use
Frequency of sanitizing food contact surfaces
Food contact surface wiping cloths
Food sinks vs. hand and utility sinks
3-compartment sink operation
Bussing and cleaning tables and non-food contact surfaces
Equipment cleaning
Machine ware washing procedures
Food waste cans
Tableware
Work station cleanliness
Pest control plan and report
Use of pesticides
Listeria monocytogenes control
Enclosures (B)
1. Facility cleaning plan and report
2. Chemicals list and material safety data sheets
3. Pest control plan and report

Facility and Equipment Maintenance

Preventive maintenance plan and report, including equipment calibration
Food contact surface equipment construction

- Non-food contact surface equipment construction
- Equipment operation
- Gaskets
- Cooling and refrigeration units
- Freezers
- Surplus equipment and items for repair
- Dunnage racks, shelving, pallets, dollies, etc.
- Backflow prevention valves for plumbing
- CO₂ backflow prevention valves
- Warewashing equipment
- Enclosures (C)
- 1. Preventive maintenance plan and report

Supplies / Buying Food

- Qualified suppliers
- Ingredient specification
- Inspection of incoming products
- Receiving food
- Substandard products
- Proper storage procedures: ambient, frozen, refrigerated
- Prevent food contamination: physical, chemical, biological
- Chemicals separation
- Container disposal
- Stock rotation

Enclosures (D)

1. Supplier qualification list
2. Supplier HACCP qualification standards
3. Supplier ingredient specifications
4. Supplier controls for safe products
5. Receiving report

FOOD PROCESS HACCP

- General
 - Determination if a production step is a CCP
 - Quality control operations
 - Methods of verification
- Menu item hazard and control groups
- Chemical additives
- Allergies and adverse food reactions
- HACCP recipe, flow charts, and HACCP plans
- Food pre-preparation hazard and control rules
 - Food thawing
 - Food washing
 - Serving raw foods
 - Hard foreign objects
 - Ingredient control
 - Allergenic ingredient control
 - Separate raw and cooked food preparation equipment
- Food preparation hazard and control rules
 - Pasteurization and quality temperatures
 - Food tasting
 - Roasts and thick foods
 - Sauté and thin foods
 - Sauces, soups, and beverages
 - Fruits, vegetables, legumes, and cereals
 - Bread, batters, and pastry
 - Hot combination dishes

- Cold combination dishes
- Food transport, holding, and serving hazard and control rules
- Hot holding
- Food serving temperatures
- Serving, packaging, transporting
- Reheating for hot holding
- Beverage dispensing equipment
- Milk product dispensers
- Salad bar
- Dispensing tableware and flatware
- Self-service food, dishes, and utensils
- Food exposed to the customer
- Table condiments
- Ice
- After service hazard and control rules
 - Food removed from temperature control
 - Returned food
 - Leftovers
 - Cooling food
 - Storage time
 - Storage containers
 - Cold holding
 - Waste products
- Carry-out, catering, and banquets hazard and control rules
- Traceability of production lots

Enclosures

1. Five retail USDA HACCP-based food process flows / Group ____: cook controls for safe products
2. Quality-assured HACCP recipe procedures
3. Quality-assured HACCP recipe procedures: Chicken cacciatore
4. QA recipe flow example: Chicken cacciatore
5. QA recipe flow with full HACCP (example): Chicken cacciatore
6. HACCP plan example: Chicken cacciatore

APPENDIX

- HACCP plans
- HACCP recipes
- Product specifications
- Validation studies
- Technical reports
